

Project Design Phase
Problem – Solution Fit Template

Date	01 September 2026
Project Type	Individual Project
Project Name	Software Installation Request Automation in ServiceNow Using Service Catalog and Workflows
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Purpose:

- Solve complex problems in a way that fits the state of your customers.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- **Understand the existing situation in order to improve it for your target group.**

Purpose / Vision: Automate and simplify software installation requests in ServiceNow

1. CUSTOMER SEGMENT(S) CS Who is your customer? Employees who need approved software installed on their work devices.	6. CUSTOMER CONSTRAINTS CC What constraints prevent the customer from taking action or limit their choices? Approval policies, software licensing, device compatibility, required request information, and IT support availability.	5. AVAILABLE SOLUTIONS AS Which solutions are available when the customer faces the problem? Email or verbal requests, manual IT tickets, direct contact with IT staff, spreadsheets or informal approvals. Familiar, but slow, inconsistent and difficult to track.
2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done or problems do you address? Submit a complete software request, obtain approval, get software installed, track progress, and resolve license-related blockers.	9. PROBLEM ROOT CAUSE RC What is the real reason this problem exists? Software requests are often handled through disconnected manual communication without standardized intake, automated approval, task routing, or exception handling.	7. BEHAVIOUR BE What does your customer do to address the problem? The employee contacts IT, sends a request, waits for approval, follows up for status, and supplies additional details when needed.
3. TRIGGERS TR What triggers customers to act? Need for a business application, onboarding, new project assignment, replacement device, or urgent work requirement.	10. YOUR SOLUTION SL Automated ServiceNow software installation request solution: Service Catalog item + structured variables + approval workflow/automation + catalog task assignment + notifications + SLA tracking + license shortage incident creation + Update Set deployment. Purpose: provide a standardized, transparent and repeatable software request lifecycle.	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE ServiceNow Service Catalog, Service Portal, request status pages and notifications. 8.2 OFFLINE Email, phone calls, verbal requests and direct IT follow-up.
4. EMOTIONS: BEFORE / AFTER EM Before: frustrated, uncertain, impatient. After automation: informed, confident, and in control.
